ABSTRACT EP 621206 A1

By providing prize award holding means (27) cooperatively associated with a container shell (21) which is closed in the conventional manner, a container assembly is achieved for randomly distributing prize awards to consumers in association with any liquid, semi-liquid, wet or moist product, without fear of consumer detection of the prize bearing containers. In accordance with the present invention, the container assembly (20) may incorporate the actual product along with the prize award or may comprise a simulated product container bearing the prize award without the actual product, but being completely indistinguishable from non-prize bearing, product-holding containers. (see image in original document)

**English Abstract**

By providing prize award holding means (27) cooperatively associated with a container shell (21) which is closed in the conventional manner, a container assembly (20) is achieved for randomly distributing prize awards to consumers in association with any liquid (30), semi-liquid, wet or moist product, without fear of consumer detection of the prize bearing containers (20). In accordance with the present invention, the container (20) assembly may incorporate the actual product along with the prize award or may comprise a simulated product container (21) bearing the prize award without the actual product, but being completely indistinguishable from non-prize bearing, product-holding containers.

**Claim**

... The construction of this embodiment of product container 20 is completed by threaded cap 36, **message disc** 37, and **container lid** 38, which is, securely affixed to cap 36, In this construction, cap 36 comprises an...that the container presently in the consumer's possession is a prize-bearing container, **message disc** 37 is employed. In this construction, **message disc** 37 comprises a substantially circular shaped **disc** which has been die cut with a plurality of radially extending slits to form a plurality of spring loaded arms. **Disc** 37 is physically placed within cap 36 directly adjacent opening 39, within the recess formed...
